Epoxy Floor Coating Advantages

Using an epoxy floor coating over your concrete floors will create a high gloss, hard wearing, and durable surface. These floor coatings offer a number of benefits and advantages from the initial installation stages to the long-term maintenance steps. For example, epoxy floor coatings are quick to install and are durable and easy to clean. Because of the many advantages that epoxy floor paint offers, this is an ideal flooring solution for many types of situations.

The following are some of the main advantages associated with choosing an epoxy floor coating for your commercial or industrial building. Your new epoxy floor coating will:

- **Create an easy to clean, seamless surface:** Our epoxy floor coating products dry to become durable, seamless surfaces that can easily be wiped free of dirt, dust, and debris. Because of this ability for easy cleaning, our epoxy floor coating services are ideal for food, beverage, and pharmaceutical preparation and packaging plants.

- **Result in a hard wearing and durable surface:** Our epoxy floor coating products turn concrete floors into a seamless and durable, high performance surface that will last for years to come.

- **Provide an attractive flooring surface:** Our epoxy floor coatings dry to a high gloss shine and are available in a variety of different colors and styles. You can chose to use one solid color or create a decorative pattern using several colors in order to create an attractive and durable flooring solution.

- **Become a chemically resistant surface:** Epoxy floor coatings are a chemically resistant flooring option for manufacturing plants, warehouses, and industrial plants.

- **Improve safety:** Our epoxy floor coating products can improve safety by creating a slip, impact, heat, and fire resistant flooring solution. These high gloss floor coatings can also improve brightness in a work area by 300%.

- **Allow for designated traffic and work zones:** We can use different colors of our epoxy floor coating products simultaneously to define safety zones, forklift traffic zones, and other work zones.

- **Increase productivity capabilities:** Using epoxy floor coatings in a factory, warehouse, or industrial plant can reduce wear on transport vehicles, allow for faster material movement, and prevent wear and damage to the floor.

- **Offer an environmentally friendly flooring solution:** Epoxy floor coatings are an environmentally friendly flooring solution for companies interested in choosing "green" alternatives and building materials.

- **Allow for quick and easy application:** Our epoxy floor coatings are self-leveling products. This allows our experienced professionals to apply an epoxy floor coating quickly over any new or old concrete floors.

- **Offer a cost efficient flooring solution:** Epoxy floor coating installation from our professional and experienced epoxy flooring providers is an affordable flooring solution. The durable and hard wearing surface that results from our floor coatings will last for years to come with little to no need for maintenance or up keep costs.
Epoxy Coating Choices for Flooring/Types of epoxy flooring coating:

- Self Dispersing Epoxy Coatings for Floors: This type of epoxy coating is commonly used in areas that receive frequent forklift or heavy truck traffic as it has very good mechanical strength. Another type of this durable epoxy coating is self dispersing epoxy with quartz sand. This type of epoxy coating is commonly used in food processing industries or other locations where liquids are present because it has good anti-slip characteristics.

- Self Leveling Epoxy Coatings for Floors: Self leveling epoxy coatings are easy to install over new and old concrete floors as they level easily creating a seamless and smooth surface. Self leveling epoxy coatings can be used in kitchens, dining rooms, storage places, garages, warehouses, office buildings, and more.

- Mortar Epoxy Coatings for Floors: This is the strongest of all epoxy floors. This type of epoxy coating is commonly used in heavy industry applications and can also be used to repair cracks before laying other types of epoxy floors.

- Graveled Epoxy Coatings for Floors: Graveled epoxy coatings are the most decorative epoxy flooring choice and they can be used for adding logotypes, brand marks, and decorative details to floors.

- Epoxy Terrazzo Floor Coatings: This type of epoxy flooring is very decorative and easy to clean. Epoxy terrazzo flooring is commonly used in large areas including hallways and entrances of commercial buildings, schools, and office buildings.

- Epoxy Antistatic Floor Coatings: This specialized epoxy coating is designed for use where static-sensitive electronic components are in permanent use and a static-free environment is most important such as in laboratories, hospitals, and electronics equipment manufacturing plants.

- Vapor Barrier Epoxy Coatings: Liquid epoxy vapor barriers are applied directly over concrete floors to provide an impenetrable surface that reduces vapor transmission to nearly zero. These epoxy coatings are typically applied prior to adding the final flooring surface including sheet vinyl, tile, carpet, or hardwood.
Jobs That we have done so far

Epoxy Oilser Limited have worked with many clients and have achieved a combined 5,000 square meter of epoxy flooring solutions for below customers

1. Semec Agencies Nigeria Limited Port Harcourt Warehouse facility measuring 1,630 sqM
2. Hellog Energy and Equipment Services Warehouse facility measuring 1,300 sqM2
3. Auto-Kinectic Auto workshop Mechanic measuring 1,500 sqM
4 GZ Industrial Supplies Mega Warehouse facility for industrial consumables in Port Harcourt measuring 1,600 square meters
5. Supplies of Epoxy Coating and application for Swimming pool in Port Harcourt River state Nigeria
6. Supplies of Epoxy Coating and application for Swimming pools in Port Harcourt Rivers State 3D almost like picture application completed successfully
7. Application of Epoxy Flooring industrial paints 5,600 SqM for a Big Farm in Ikorodu Lagos Port Harcourt (name with held on customers request).
8. Application of 3D Epoxy Flooring in Various Locations in Abuja
